## DETAILED ACTION

### *Terminal Disclaimer*

1. The Terminal Disclaimer, filed on 10/24/01, of prior Patent U.S 6,208,054, is received and approved. As a result the rejection under Obviousness Double Patenting is hereby withdrawn.

### *Allowable Subject Matter*

2. **Claims 18-27** are allowed.

### *Reason for Allowability*

3. The following is an examiner's statement of reasons for allowance: the primary reason for the allowance is the including of the limitations of a permanent magnet electric rotary machine comprising: a stator having winding; a rotor having a plurality of permanent magnets being inserted in insertion holes that are arranged circumferentially in a ring shaped arrangement, wherein the magnets are arranged so that at least one magnetic gap is provided both sides of the permanent magnets, the gap is located between the magnets and the auxiliary magnetic poles, thereby a change in a magnetic flux density between the plural magnets and the auxiliary magnetic poles is formed smoothly and a cogging torque is restrained.

Art Unit: 2834

Comparing to the prior-art of the record, the Examiner concurs with the applicant that the Brandes reference does not disclose a permanent magnet motor with the rotor having auxiliary magnetic poles and magnets with magnetic air gaps therebetween that enable the magnetic flux density between the magnets and the auxiliary magnetic poles for restraining the cogging torque. Thus, none of the prior art references of the record, either stand alone or in combination, has taught or suggest the above-mentioned features in combination with other limitations recited in the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
